

# CERESLOG

VEGETATED

## Difficult Jobs Made Easy

Ceres Log Vegetated coir log technology ensures that you will successfully install and establish native plants on any project site, regardless of project difficulty.

## Maintenance Free

Ceres Log Vegetated coir logs require no maintenance or watering after installation.

## Confidence

Ceres Log Vegetated coir logs allow a specifier to know with certainty that the system they designed will be provided; and an installer to know that their installation will be successful with no call backs.

## All Year Round

Ceres Log Vegetated coir logs allow the use of soil bioengineering techniques with woody or herbaceous species in spring, summer, fall, and winter.
