

The Future of Stormwater  
Management is Here

Introducing...

THE **VAULT** SYSTEM

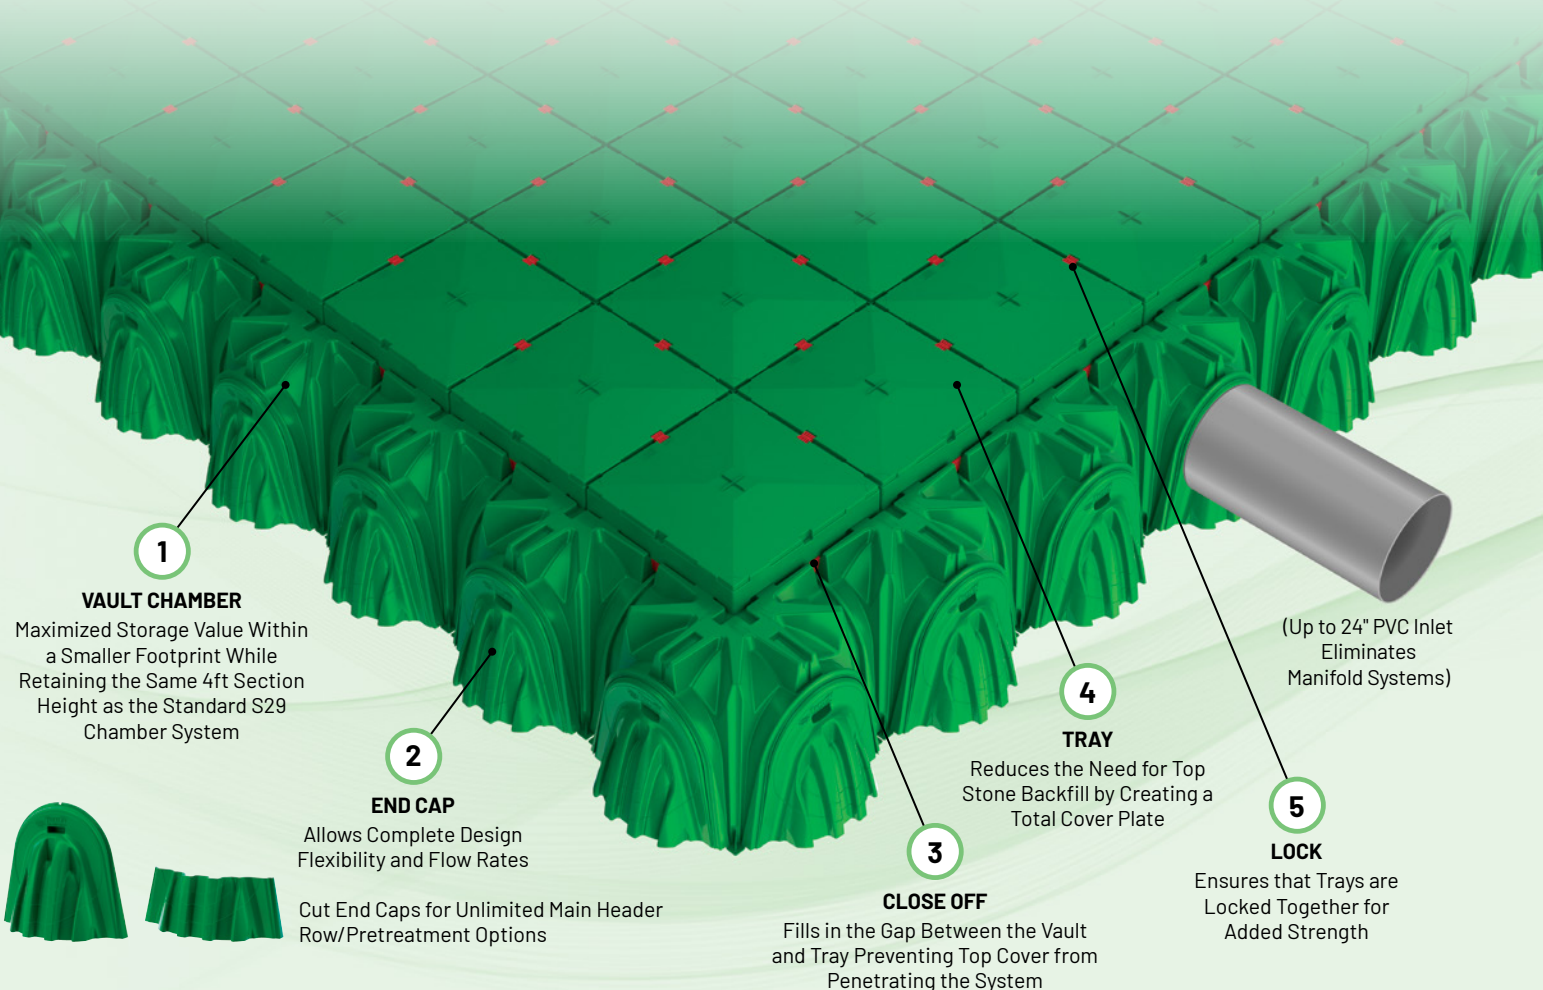

# THE TRITON VAULT SYSTEM CHANGES EVERYTHING

Maximizes Storage | Reduces Stone Costs up to 70% | Less Labor Costs

Once again, Triton Stormwater Solutions raises the bar with the introduction of the revolutionary Vault System – this innovative 5 Component System uses the classic Roman Groin Vault, in addition to end caps, trays, close offs and locks to create a stormwater system like no other. Its strength, improved interior storage capacity per square foot, endless design flexibility and its ability to reduce stone costs up to 70% makes the Vault System **the must have** stormwater system on the market.

Tray Design  
Eliminates up  
to 70% of  
Stone Backfill

Up to 92%  
Storage  
Efficiency

Complete Design
